

Cree® DDS Series

LED Disk Light

BETTER LIGHT. SIMPLE INSTALLATION.

Multiple Installation Options

Suitable for new construction as well as retrofits, these surface-mount LED lights can be installed using 4-inch junction boxes. With the addition of an accessory kit, the 4-inch disk light can be used in 4-inch recessed cans and the 6-inch disk light used in 5- or 6-inch recessed cans with E26 or GU24 sockets. These disk lights are also rated for dry, damp and wet locations, both indoors and outdoors.

High Quality Without the High Cost

The Cree® DDS Series features 90+ high CRI light, instant on, smooth dimming down to 10% and a semi-flush designer look to satisfy your décor savvy clients. Available in 2700K, 3000K and 4000K, these disk lights deliver a high-quality lighting experience without the high cost.

Ahead of the Curve on Compliance

All models meet CEC Title 24 requirements and meet or exceed all ENERGY STAR® requirements.

CREE  TM

CREE® DDS SERIES LED DISK LIGHT

The Cree DDS Series disk lights are engineered to give you maximum flexibility for installation without compromising light quality. Suitable for new construction as well as retrofit renovations, these wet-rated surface mount LED lights can also be used indoors or outdoors. With a 50,000 hour lifetime and 90+ CRI, these fixtures will illuminate your clients' work and living spaces with beautiful, high quality light at a reasonable price.

Applications

Residential and Commercial Lighting

If you're looking to save on the cost of installing cans throughout new construction or a renovation, consider Cree's family of disk lights. Our surface mount disk lights can be installed using a junction box or recessed can, saving you time and money.

Cree's disk lights give you versatility as well as cost efficiency for large commercial residential spaces, such as hotels, apartment complexes and condos. They are an excellent choice for closets, storage areas, attics, hallways and more.

Healthcare

Cree's DDS Series disk lights are ideal for residential facilities, such as nursing homes and rehabilitation centers. Our 90+ CRI light makes colors true and natural, minimizing both patient and staff fatigue while improving visibility for diagnosing and treating patients.
