

Roxtec Pre-compression tools

Roxtec pre-compression tools simplify the installation of sealing modules and compression units. They can pre-compress the contents of the frame making room for the compression unit and also hold the packing material in place during short breaks in the installation work. The pre-compression tool S/L is used when pre-compression force is needed early in the installation. It has a long stroke and can be used in incomplete installations when the installation will be partially installed over longer periods of time. The eccentric tools in lightweight aluminum are designed to fit standard 3/8" square drives. They come in three different sizes to be used at different packing heights. The pre-compression wedges excite a strong force by the tightening of a screw. They have a small footprint and are used just before inserting the wedge. They have a long-lasting expansion and can be left in the frame over time to fixate the packing material. The handgrip pre-compression tool is a lever that distributes force in the frame by manual force. It has a small footprint to fit the smallest gaps and is used directly before inserting the Roxtec wedge.

 Practical tools to simplify compression of sealing modules

Product	Art. No
PRE-COMPRESSION TOOL SMALL	5ICT000001269
PRE-COMPRESSION TOOL LARGE	ICT0001000000
PRE-COMP ECCENTRIC TOOL SMALL	ICT0001000302
PRE-COMP ECCENTRIC TOOL LARGE	ICT0001000301
PRE-COMP ECCENTRIC TOOL COMPACT	ICT0001000316
PRE-COMPRESSION WEDGE 120	ICT0001000500
PRE-COMPRESSION WEDGE 40	158828
PRE-COMPRESSION WEDGE 40/60	5ICT000003691
HANDGRIP PRE-COMP	ICT0001000401
