The novel-metropolitan inspired Step Light provides low level shielded output for illumination of steps and walkways. The light engine is mounted in a baffled flush rectangular opening to maximize light levels on the walking path with minimal glare from the fixture. The internal die cast aluminum heatsink and IP66 sealed housing combined with long-lasting LED lifespan provides architectural accent lighting for years maintenance free service.

- Energy savings of 80% over halogen or compact fluorescent
- Excellent thermal management for LED longevity
- Fully shield glare free optics
- Type V optical distribution
- Sophisticated die cast housing with weather-resistant black, bronze, and white powdercoat finish
- Frosted tempered glass lens with silicone gaskets that meets IP66 sealing criteria
- 4 Watt DuraLED array, 4000K CCT Standard
- Mounts into recessed single-gang junction box provided with two 1½"-6-32 Philips bevel head stainless steel screws.
- Non-dimming 120V driver, 50/60Hz, integral on-board design
