

Installation Services

For commercial and residential charging stations

Enel X Way's installation services are a full-service solution for electric vehicle charging needs. Whether you are installing at home or your place of work, Enel X Way's installation services offer site evaluations, installation, and centralized billing to simplify your EV charging journey. Enel X Way's installation and O&M services include 24/7 customer service through our network of certified maintenance partners, guaranteeing you the best service and the quickest turnaround time.

Installation Pricing Process

Pre-Site Checklist

Customer will provide photos of their electrical panel, subpanel, installation site through the installation web portal.

Quick Price

Enel X Way will provide an estimate through this portal, subject to change based on pending site walk.

Site Walk

If interested in pursuing installation services, a site walk will be conducive to gather information for a final price.

Final Price

Customer will receive a final quote.

Why Opt for Installation Services?

One-Stop Shop

Upload documents, receive a quote, and begin the installation process within one portal.

Quick & Simple Evaluation

No need for multiple site visits and evaluations. Our team will evaluate your site to determine your best installation options.

Supportive Project Management

Enel X Way will find an installer for you and coordinate the estimate and installation time so you can rest easily.

Streamlined Payment

The simplified billing process includes hardware, installation, and electrical servicing for streamlined invoicing.

Certified Installation Partner

Enel X Way's installation and maintenance partners are certified and guarantee high quality installation of both Level 2 and Level 3 EV charging equipment.

Save with Eligible Incentives

Enel X Way makes sure you're benefiting from all applicable incentives and rebates when creating your estimate to help you save on your EV charger installation.

Thanks to these partnerships with key operators, Enel X Way operates as a general contractor extending our services to include:

- Load analysis
- Professional design & engineering
- Permit submittal / management
- Budgetary virtual estimates
- Permittable plan set
- EVSE commissioning & set up of Enel X Way software
- Site survey & coordination
- Utility coordination for infrastructure (make-ready) upgrades
- Utility & state incentive support
