

# Angle Changer, Polarized for bar light LBAxxxx

## ZBAG105

Part Number

### Technical Data

#### Optical Data

Beam angle  $\pm 7^\circ$

Polarization Filter yes

#### Mechanical Data

Housing Material ABS, PC, PVAL, TAC

- Long service life
- Operates with infrared illumination

wenglor ZBAG0xx are optical accessories for the LBA bar lights. They are small optical diffusers that increase the beam angle emitted from the bar light. This allows the user class leading flexibility from a single light source. The angle changers allow the user to create a variation of light outputs on a single product, enabling patented lighting techniques such as the curve effect. The angle changer widens the beam angle of the LBA bar lights up to the specified value of the opening angle stated in the datasheet.

### Complementary Products

Bar light

All dimensions in mm (1 mm = 0.03937 Inch)
