

# Ring Light

infrared, 50 mm

## ZVZF102

Part Number

- Can be mounted together with Smart Camera or Machine Vision Camera
- Continuous mode or strobe mode synchronized with the camera
- Homogeneous and very bright illumination without shadows

wenglor ring lights are ideally suited for uniform illumination. Thanks to 360° annular floodlighting, shadows can be reduced and image quality can thus be improved. They can be operated in continuous mode, or synchronized to the camera in flash mode. The rugged housing with IP67 protection and standardized mounting together with Smart Cameras or Machine Vision Cameras simplify integration into existing systems and generate lots of space for new system concepts.
